Education

Master of Computer Applications, Graphic Era Hill University	2022 – 2024
Bachelor of Science, Hemvati Nandan Bahuguna Garhwal University	2017 – 2020

Experience

Software developer , Ftechiz Solutions - Dehradun	Sept 2024 – Present
- Developed and maintained 6+ production grade full-stack web applications using React.js, Next.js, Node.js, Express.js, Spring Boot and AWS, improving client delivery timelines through reusable components and scalable architecture. - Designed, developed, and integrated RESTful APIs, third-party services, and payment gateways, reducing API response time by 30% through query optimization and efficient backend design. - Built responsive, cross-platform user interfaces with a strong focus on performance, accessibility, and user experience. - Collaborated within an Agile team to deliver high-quality software through sprint planning, code reviews, testing, and continuous integration. - Implemented serverless cloud solutions on AWS to improve scalability while reducing infrastructure and maintenance costs.	

Projects

MLinc – Membership Program Engine	Live
<i>Tech Stack: React.js, Redux Toolkit, Spring Boot, MySQL, AWS, Redux Toolkit, Tailwind CSS, ShadCN UI</i>	
- Developed a membership management and marketing automation platform that enables organizations to create, manage, and personalize member engagement campaigns. - Designed and built the Voucher Portal, replacing the legacy Clubeez portal, simplifying voucher creation, distribution, redemption, and tracking through an intuitive workflow. - Architected and implemented a dedicated Spring Boot microservice with MySQL for voucher management, integrating seamlessly with the MLinc backend via REST APIs, optimized API response time by 25%. - Built reusable, responsive UI components using React.js, Tailwind CSS, and ShadCN UI, ensuring a consistent experience across desktop and mobile devices. - Managed complex client-side state using Redux Toolkit, improving application scalability, maintainability, and predictable data flow. - Deployed and maintained the voucher microservice on AWS with 99.9% uptime, enabling reliable and scalable production deployment.	
Insight Funders – Fintech Platform	Live
<i>Tech Stack: Next.js, Redux Toolkit, PostgreSQL, Drizzle ORM, Supabase, Plaid API, Dwolla</i>	
- Developed a secure full-stack fintech platform connecting businesses with non dilutive funding opportunities and enabling investors to discover pre-qualified investment prospects. - Developed high-performance SSR and API routes using Next.js and TypeScript, optimizing page load times and search engine visibility. - Designed scalable database schemas with PostgreSQL and Drizzle ORM, ensuring type-safe queries and maintainable data access. - Implemented secure authentication and real-time data synchronization using Supabase. - Implemented Plaid API integration for secure bank account linking and financial data access, while integrating Dwolla for ACH payments and fund transfers - Delivered production-ready financial workflows by emphasizing secure API integrations, scalable architecture, and reliable transaction handling.	

Ascend – AI Health & Wellness Platform

Live

Tech Stack: React.js, Express.js, DynamoDB, OpenAI SDK, Stripe, AWS Lambda, API Gateway, EC2, SES, S3

- Developed a full-stack AI-powered health and wellness platform that evaluates users across 8 wellness dimensions: Belief, Gratitude, Perspective, Compassion, Resilience, Time, Purpose, and Balance to deliver personalized wellness insights.
- Built an AI Spiritual Coach using the OpenAI SDK that analyzes assessment results and generated 1,000+ personalized AI powered wellness recommendations based on users' assessment scores.
- Engineered scalable serverless backend services using Express.js, AWS Lambda, and API Gateway, reducing infrastructure costs by up to 70% through on demand execution while supporting seamless scaling.
- Implemented secure authentication and authorization using Amazon Cognito, integrated Amazon SES to automate 500+ reminder emails for daily wellness tasks, and leveraged Amazon S3 for secure data storage.
- Designed and optimized DynamoDB data models with Dynamoose, enabling low latency data access.
- Integrated Stripe to implement secure subscription management, successfully processing 50+ subscription payments for premium plan access.
- Deployed and maintained cloud infrastructure on AWS, integrating 6+ AWS services to deliver a secure, scalable, and production-ready application.

Certifications

Generative AI by Microsoft and LinkedIn

[View Certificate](#)

ReactJS by Infosys Springboard

[View Certificate](#)

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, SQL

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, ShadCN UI

Backend: Node.js, Express.js, Spring Boot, REST APIs, JWT Authentication, Serverless Framework

Databases: MySQL, MongoDB, PostgreSQL, DynamoDB

Cloud & DevOps: AWS Lambda, EC2, API Gateway, Cognito, S3, SES, Docker, GitHub Actions

Testing Tools: Jest (Unit testing), React Testing Library

Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA
